FRIDAY, APRIL 21  
GREEN BUILDINGS DAY  
*Build Smart, Build Sustainable*

**GreenDC**  **Week**  
**Think Green DC!** **April 17-23, 2006**

The physical structures of D.C. take their toll on the natural environment. This day will feature building techniques that tread more lightly on our Earth through the use of reclaimed materials, more energy efficient technologies, the use of less or non-toxic materials, and other environmentally beneficial methods.

**Partners:** DC Energy Office, U.S. Green Building Council, Department of Parks & Recreation
